

PROMARK ELECTRONICS, INC.
The process of innovation

William J. Kilpatrick
B&C Restoration & Paint
6360 Dean Parkway
Ontario, NY 14519

Dear Bill:

I've been meaning to get this note of appreciation off to you for doing such a superb job on the rebuilding of my 1951 Ford F1. From start to finish, your attention to details was exceptional. You and your organization are true professionals and I'm thankful I made the decision to go with your company. You guys are incredible.

What I particularly enjoyed as the project progressed was receiving pictures of the progress that was made from week to week. Seeing the truck disassembled, modified, fitted with new hardware, then reassembled and going through that process many times was exciting to me. Each week I looked forward to seeing the metamorphosis that was occurring.

Kirk Willis, your Project Manager, was a joy to work with. Kirk presented options for me to consider time and again and then implemented those options as we worked toward the completion of my truck.

Additionally, I also appreciated your detailed weekly billing applied to my deposits which left no surprises in the end. The biggest surprise was that my truck was completed on time and under budget. I just love the way it looks and the way it sits. It gives me great pride to be driving this beautiful truck and to see how many people appreciate your work of art as well. You guys are the best! I would not hesitate to recommend B&C Restoration to anyone who is embarking on a similar project.

It is literally a dream come true! My thanks to everyone who helped make it happen.
